EAA SPIRIT

One of the pleasures of being an EAA member is the arrival each month of *Sport Aviation*. The magazine always contains a wealth of information and articles of other members' projects. This month Tom Poberezny's column spoke to the "consistent culture" of EAA, which involves volunteering, helping one another, and advancing aviation. Clearly these characteristics are alive and well in Chapter 430.

During the past year we have had great participation in the Young Eagles program, including the gratifying day with the kids from Belarus. We provided a modest scholarship to help a young woman take the first steps toward a career in aviation and launched an ongoing aviation scholarship program. The wind indicator is installed in the segmented circle at Sequim Valley. The summer bar-B-Q meetings were well attended and everyone was well fed. We had many fine programs at the regular meetings.

Perhaps the best mark of the health of the chapter is the number of active building projects underway. Building airplanes is the very core of what EAA is about and the glue that holds everything together. By my quick count there are at least 10 projects in some state of construction. In a chapter our size, I believe that is pretty remarkable.

The real credit for these accomplishments belongs to the members. All of the above activities involve the participation of many individuals pulling together.

One cannot reflect on the year without remembering the loss of Skip and Pat. Their spirit continues to inspire us all.

The November meeting is our annual election, so please let's have a good attendance. We also have an interesting program planned.

The Christmas party will be Dec. 9th at the Secret Garden Restaurant in Port Angeles. As usual members of Clallam County Pilots are invited to join us.

Gary Johnson

Update from Laura Dunham

October 31,2006

Hello Donna:

Just a quick note to tell you how great things are going. I am getting a 3.4 in ground school and I plan to solo next week! We just had midterms last week and we get our tests back today. I am confident I received a 90% or higher. The weather is freezing and dry, the perfect combo for airplane performance! Well I'm off to English class.

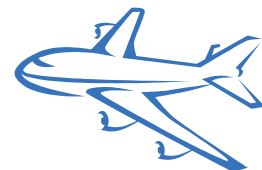

Take care, Laura

Paul was flying from Seattle to San Francisco. Unexpectedly the plane stopped in Sacramento along the way. The flight attendant explained that there would be a delay, and if the passengers wanted to get off the aircraft, the plane would re-board in 50 minutes.

Everybody got off the plane except one gentleman who was blind. Paul had noticed him as he walked by and could tell the gentleman was blind because his seeing eye dog lay quietly underneath the seats in front of him throughout the entire flight. Paul could also tell this gentleman had flown this very flight before because the pilot approached him, and calling him by name said "Keith, we're in Sacramento for almost any hour. Would you like to get off and stretch your legs?" The blind man replied, "No, but maybe my dog would like to stretch his legs."

Picture this: All the people in the gate area came to a complete standstill when they looked up and saw the pilot walk off the plane with a seeing eye dog! The pilot was even wearing sunglasses! People scattered! They not only tried to change planes, but they were trying to change airlines!

True story... Have a great day and remember... Things aren't always as they appear!
